

TOUCHABLE PRINTING

True-to-Life Colours + Textures

Printing has gone far beyond putting ink on paper. Today there are many more ways to increase impact, motivate response + extend the life of print materials.

As competition continues to grow, small business marketers look for ways to stand out in the marketplace. New technologies have created tremendous capabilities for producing affordable print materials that are flexible, sophisticated, impactful and more customer-intimate than ever before.

Traditional offset press runs can be the best solution for large quantities, while digital printing offers economies for shorter runs and faster turnaround. Not to mention, with digital printing, messages that were once generic can now be customized with a technique called variable data printing and speak directly to a customer or a group of customers, delivering better response than mass marketing messages. Today's printing technologies enable you to tailor mailings, brochures, catalogues and other items to appeal to specific needs and interests.

Our team will work with you to analyze your marketing materials, then advise you on the most appropriate printing process for your project. We will also suggest design solutions, type of paper or substrate, and ways to maximize efficiency.

► **When it comes to colour, we're the right match.**

LET YOUR WORK COME TO LIFE

We offer a variety of printing options ranging from simple one colour jobs to sophisticated full colour pieces. With our combination of offset and digital printing capabilities, we create solutions that give you exactly what you need for your business printing. So whether you need printing or copies, we deliver with speed, precision and quality.
